Proper stance of a guard is a crouch with the feet spread so that the toe of the outside foot is on a line with the heel of the inside foot. Very little weight is on the hands. From this position, the player can charge ahead, or pull out of line to aid a runner.

The charge should be low and from unde

Today's Umanac October 22nd 1811-Franz Liszt. Hungarian composer 1794. Fort Wayne, Indiana, completed by-and named after-Gen. Anthony wayne. 1883 Metropolitan Opera House, New york, opened, with first night audience turning in a fine performance

subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, October 20.

The Golden text was "We are ambassadors for Christ, as though God did beseech you by us: we pray you in Christ's stead, be ye reconciled to God" (II Cor. 5:20).

Among the citations which comprised the Lesson-Sermon are the following from the Bible: "Wherefore seeing we also are compassed about with so great a cloud of witnesses, let us lay aside every weight, and the sin which doth so easily beset us, and let us run with patience the race that is set before us. Looking unto Jesus the author and finisher of our faith; who for the joy that was set before him endured the cross, despising the shame, and is set down at the right hand of the throne of God" (Hebrews 12: 1, 2). The Lesson-Sermon also included

the following passages from the Christian Science textbook, "Science and Health with key to the Scriptures," by Mary Baker Eddy: "If Truth is overcoming error in your daily walk and conversation, you can finally say, 'I have fought a good fight. I have kept the faith, because you are a better man. This is having our part in the at-one-ment with Truth and Love" (p. 21).

FRECKLES AND HIS FRIENDS

UARDS today aren't the big men of yester-Guarden time use increased in the use in the use year; they are necessarily light and fast, for they must pull out and run interference on all end runs and trick maneuvers. However, a guard must carry enough beef that he can hold his own on defense. Proper stance of a guard is a crouch with

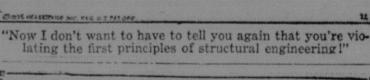

the feet spread so that the toe of the outside foot is on a line with the heel of the inside foot. Very little weight is on the hands. From this position, the player can charge ahead, or pull out of line to aid a runner.

The charge should be low and from under neath, so as to lift the defense away from the After a defensive guard has tak his immediate opponent, his next duty is to look for the man with the ball.

subject of the Lesson-Sermon in all LESSON "ATONEMENT" Churches of Christ, Scientist, on Sunday, October 20. The Golden text was, "We are am-"Doctrine of Atonement" was the bassadors for Christ, as though God

did beseech you by us; we pray you in Christ's stead, be ye reconciled to God" (II Cor. 5:20).

Among the citations which comprised the Lesson-Sermon are the following from the Bible: "Wherefore seeing we also are compassed about with so great a cloud of witnesses, let us lay aside every weight, and the sin which doth so easily beset us, and let us run with patience the race that is set before us, Looking unto Jesus the author and finisher of our faith; who for the joy that was set before him endured the cross, despising the shame, and is set down at the right hand of the throne of God" (Hebrews

The Lesson-Sermon also included the following passages from the Christian Science textbook, "Science and Health with key to the Scriptures." by Mary Baker Eddy: "If Truth is vercoming error in your daily walk and conversation, you can finally say, 'I have fought a good fight. I have kept the faith, because you are a better man. This is having our part in the at-one-ment with Truth and Love" (p. 21).
